

## **Coriendo Selected by MRO to Build Its Patient Portal Offering**

Bala Cynwyd, PA – October 27, 2011– Coriendo, LLC has been selected by MRO Corp to develop a Patient Portal to serve its client list which includes Hospitals and Health Systems. The online communication platform will be integrated with MRO's existing release-of-information system to allow direct patient access to records and to assist with hospital meaningful use attestation. MRO's patient portals will be hospital-branded and designed specifically to suit the individual needs of the healthcare facilities and their patients. The portal websites will allow patients to easily utilize a secure platform to access their health information.

A significant aspect of this project is Coriendo's use of a Business Process Management suite of software tools called Enj that enables Coriendo to develop the patient portals for MRO without the need to write computer code. This results in faster and more efficient development, reduced cost, the ease of customizing the patient portal to reflect the requirements of each hospital, and most importantly the ease of making modifications as needed in the future.

### **About MRO Corp**

MRO Corp is a market leader for Disclosure Management in healthcare providing electronic release-of-information (ROI), payer audit compliance and tracking, accounting of disclosures (AOD), meaningful use, patient portal and document management solutions. Through a proprietary disclosure management platform and market-specific expertise, MRO facilitates the secure exchange of Protected Health Information (PHI) between the healthcare provider and third-party requesters. MRO is based in King of Prussia, PA.
